Caste and Politics in Contemporary India

Mahesh Kumar Chobdar

Introduction

Caste has been an integral part of India's socio-political fabric for centuries. Originating from the ancient *Varna* system, caste has evolved into a rigid hierarchical structure that influences every aspect of Indian life, including politics. In contemporary India, caste continues to play a crucial role in shaping political behavior, party strategies, and policy outcomes. Despite constitutional provisions aimed at eradicating caste-based discrimination, its pervasive influence persists, raising critical questions about the intersection of caste and democracy.[1]

This article explores the dynamics of caste and politics in contemporary India, focusing on its historical roots, its impact on political participation, party politics, electoral behavior, and policymaking. It also examines the challenges and opportunities for caste-based politics in fostering social justice and inclusion.

Historical Context of Caste in Indian Politics

The relationship between caste and politics in India is deeply rooted in history. During the colonial period, the British administration institutionalized caste identities through policies like the census and reservation in government jobs and education. This period also saw the emergence of anti-caste movements led by leaders like Jyotirao Phule, Periyar, and B.R. Ambedkar, who sought to challenge the entrenched caste hierarchies.

Post-independence, the Indian Constitution, drafted under

Ambedkar's leadership, sought to dismantle caste-based discrimination through provisions like Article 15 and Article 17, which prohibit discrimination and untouchability, respectively. The reservation policy for Scheduled Castes (SCs) and Scheduled Tribes (STs) in education, employment, and legislatures was introduced as a measure to promote social justice.

Despite these constitutional safeguards, caste remained a significant factor in Indian politics, shaping electoral strategies, policy decisions, and social movements.

Caste and Electoral Politics

a. Role of Caste in Voting Behavior

Caste plays a pivotal role in shaping voting behavior in India. Political parties often rely on caste-based vote banks to secure electoral victories. Studies have shown that voters tend to align with candidates from their caste group, perceiving them as more likely to address their community's interests. For instance, the dominance of Yadavs in Uttar Pradesh politics or the consolidation of *Dalit* votes by the *Bahujan Samaj Party* (BSP) highlights the enduring influence of caste in elections.[2]

Political parties often target specific caste groups as "vote banks," tailoring their manifestos and promises to address the concerns of these communities. For instance, dominant castes such as the Jats, Yadavs, and Marathas have historically wielded significant influence in their respective regions.[3]

The fragmentation of caste groups has led to the formation of strategic alliances, such as the *Mahagathbandhan* (Grand Alliance) in Bihar, which united various caste-based parties to challenge dominant political players.

b. Caste Coalitions and Alliances

The formation of caste-based coalitions has been a hallmark of Indian politics. Parties often forge alliances with caste groups to expand their electoral base. For example, the *Rashtriya Janata Dal* (RJD) in Bihar has successfully mobilized the Yadav-Muslim coalition, while the *Bharatiya Janata Party* (BJP) has sought to consolidate upper-caste votes while reaching out to non-dominant OBCs and *Dalits.*[4]

The fragmentation of caste groups has led to the formation of strategic alliances, such as the *Mahagathbandhan* (Grand Alliance) in Bihar, which united various caste-based parties to challenge dominant political players.

Emergence of Caste-Based Political Parties

Despite affirmative action, the political representation of marginalized groups such as *Dalits* and *Adivasis* often depends on their ability to mobilize as a cohesive voting bloc. Leaders like Kanshi Ram and Mayawati have championed *Dalit* empowerment, reshaping the political narrative.[5]

The rise of caste-based political parties, such as the BSP and the *Samajwadi Party* (SP), underscores the centrality of caste in Indian politics. These parties have provided a platform for marginalized communities to articulate their demands and challenge the dominance of upper-caste elites in politics.

Caste and Political Representation

a. Underrepresentation of Marginalized Castes

Despite affirmative action policies, marginalized castes continue to face underrepresentation in political institutions. While SCs and STs have reserved seats in legislatures, their participation in decision-making processes often remains limited due to structural inequalities and tokenism.

b. Women and Caste in Politics

The intersection of caste and gender further compounds the challenges faced by women from marginalized communities. *Dalit* women, for instance, face triple discrimination based on caste, gender, and class, limiting their political representation and participation.[6]

Rise of Caste-Based Movements

Caste-based movements have been instrumental in reshaping India's political and social landscape. These movements often emerge as responses to systemic inequality and discrimination.

1. *Dalit* Movements:

Dalit movements are among the most prominent caste-based movements in India. These movements aim to combat caste-based atrocities, dismantle the Socio-economic inequalities perpetuated by the caste system, and secure justice and dignity for *Dalits* (formerly referred to as "untouchables").

Historical Roots and Early Leaders

- **Jyotirao Phule**: One of the earliest anti-caste reformers, Phule founded the *Satyashodhak Samaj* in 1873 to challenge Brahmanical dominance and advocate for the rights of lower castes.
- **B.R. Ambedkar**: Known as the architect of the Indian Constitution, Ambedkar was a towering figure in *Dalit* emancipation. He led movements like the *Mahad Satyagraha* (1927) to assert *Dalit* rights to access public water sources and temples. His conversion to Buddhism in 1956, along with millions of followers, marked a significant rejection of the Hindu caste system.

Post-Independence *Dalit* Movements

- ***Dalit* Panthers**: Inspired by the Black Panthers in the United

States, this radical movement emerged in Maharashtra in 1972. It sought to address caste-based violence, discrimination, and socio-economic exclusion through direct action and cultural assertion.

- **Bahujan Samaj Party (BSP)**: Founded by Kanshi Ram in 1984, the BSP transitioned *Dalit* activism into mainstream politics. Under Mayawati's leadership, the BSP became a major political force, championing *Dalit* rights and governance.[7]

Key Themes and Achievements

- **Assertion of Identity**: *Dalit* movements have emphasized reclaiming dignity and rejecting the stigmatization associated with caste.
- **Legislative Gains**: These movements have been instrumental in the enactment of laws such as the Scheduled Castes and Scheduled Tribes (Prevention of Atrocities) Act, 1989.
- **Cultural Reclamation**: Movements have focused on celebrating *Dalit* literature, art, and history to challenge the dominant caste narratives.

2. OBC Mobilization

The mobilization of Other Backward Classes (OBCs) gained momentum in the latter half of the 20th century. These movements were driven by demands for greater socio-economic and political representation for communities traditionally considered "backward" but not as marginalized as *Dalits*.

The Mandal Commission and its Impact

- The **Mandal Commission Report** (1980), chaired by B.P. Mandal, recommended a 27% reservation for OBCs in government jobs and educational institutions. Its

implementation in 1990 by Prime Minister V.P. Singh triggered widespread protests, particularly from upper-caste groups, but also marked a turning point in OBC empowerment.

- The Mandal Commission's recommendations recognized caste as a key determinant of socio-economic disadvantage, leading to significant political mobilization among OBCs.

Political Leadership and Representation

- **Lalu Prasad Yadav** (Rashtriya Janata Dal) and **Mulayam Singh Yadav** (Samajwadi Party) were notable OBC leaders who used caste-based mobilization to gain political power in states like Bihar and Uttar Pradesh.
- The rise of OBC leaders signified a shift in political dynamics, challenging the dominance of upper-caste elites in governance.

Key Themes and Achievements

- **Economic Upliftment**: OBC mobilization has led to policies aimed at improving access to education, employment, and social welfare.
- **Political Empowerment**: The emergence of OBC-dominated parties has restructured political alliances and electoral strategies in many states.

3. Dominant Caste Movements

Dominant caste movements represent the political and economic demands of traditionally influential caste groups, such as Jats, Patidars, and Marathas, who feel their socio-economic and political dominance is under threat.

Main Movements

- **Jat Agitations**: The Jats of Haryana, Uttar Pradesh, and Rajasthan have organized multiple protests demanding OBC status and reservations in jobs and education, citing economic

hardships.

- **Patidar Movement**: Led by Hardik Patel, the Patidar agitation in Gujarat (2015) demanded OBC status for Patidars, highlighting the economic struggles of the agrarian community.
- **Maratha Protests**: The Marathas of Maharashtra have similarly sought reservations, arguing that their traditional dominance has been eroded by economic challenges and changing social dynamics.

Drivers of Dominant Caste Movements

- **Economic Decline**: Many dominant castes have faced declining agricultural incomes and limited opportunities in the private sector, prompting demands for reservations.
- **Perceived Loss of Status**: The rise of *Dalit* and OBC movements has challenged the socio-political dominance of these castes, leading to a sense of insecurity.

Key Themes and Achievements

- **Reservation Demands**: These movements have pressured governments to expand the reservation framework, often leading to legal and policy changes.
- **Regional Political Influence**: Dominant caste groups have leveraged their numerical strength to influence regional politics and governance.

Caste in Policymaking and Governance:

a. Reservation Policies

Reservation policies have been a contentious issue in Indian politics. While they have enabled upward mobility for many individuals from marginalized communities, they have also faced criticism for perpetuating caste identities and fostering resentment

among non-beneficiary groups. Affirmative action policies provide reservations in education, employment, and legislatures for SCs, STs, and OBCs.

The Scheduled Castes and Scheduled Tribes (Prevention of Atrocities) Act, 1989:

This law aims to protect marginalized communities from caste-based violence and discrimination.

b. Education and Skill Development:

Government initiatives like scholarships and skill development programs target the socio-economic upliftment of marginalized groups.

c. Welfare Schemes and Caste

Governments often design welfare schemes targeting specific caste groups to address historical injustices. For example, schemes like the Scheduled Caste Sub-Plan (SCSP) and Tribal Sub-Plan (TSP) aim to allocate resources for the development of SCs and STs. However, the implementation of these schemes often faces challenges due to corruption and lack of accountability.[8]

Challenges to Caste-Based Politics

1. Fragmentation of Caste Identities

The fragmentation of caste identities poses a challenge to caste-based politics. With the rise of intra-caste divisions and demands for sub-categorization within OBCs, political parties find it increasingly difficult to consolidate caste groups.

2. Urbanization and Modernization

Urbanization and modernization have led to some erosion of caste-based identities, particularly among the urban middle class. However, caste continues to influence social and political interactions, even in urban settings.

3. Rise of Hindutva Politics

The rise of Hindutva politics has sought to subsume caste identities under a broader Hindu identity. While this strategy has been successful in some regions, it has also faced resistance from marginalized communities who view it as an attempt to undermine their distinct identities and demands for social justice.[9]

4. Caste-Based Violence

Caste-based violence, including atrocities against *Dalits* and inter-caste conflicts, remains a pervasive issue. The National Crime Records Bureau (NCRB) reports a steady rise in crimes against Scheduled Castes and Scheduled Tribes.[10]

5. Economic Disparities

Economic inequality often intersects with caste, with marginalized groups disproportionately represented among the poor. Policies aimed at bridging these gaps, such as affirmative action, face resistance and allegations of reverse discrimination.

6. Tokenism in Representation

While there has been an increase in the political representation of marginalized groups, critics argue that this often translates into tokenism rather than substantive empowerment.

7. Caste and Digital Media:

Social media platforms have emerged as new battlegrounds for caste-based narratives, both empowering marginalized voices and amplifying casteist rhetoric.

Opportunities for Social Justice

1. Empowerment through Political Participation

Caste-based politics has provided a platform for marginalized communities to assert their rights and demand inclusion. The political mobilization of *Dalits*, OBCs, and other marginalized groups has led to

significant policy changes and greater awareness of social justice issues.

2. Role of Civil Society and Movements

Civil society organizations and social movements have played a crucial role in addressing caste-based discrimination and advocating for policy changes. Movements like the *Dalit* Panthers and the contemporary anti-caste activism on social media have amplified the voices of marginalized communities.[11]

3. Education and Awareness

Education and awareness campaigns have contributed to challenging caste-based prejudices and promoting a more inclusive society. Initiatives aimed at empowering marginalized communities through education have shown promising results in reducing caste-based disparities.

The Way Forward

To address the challenges posed by caste in contemporary politics, a multi-pronged approach is required:[12]

1. **Strengthening Legal Mechanisms**:

   Robust implementation of anti-discrimination laws and affirmative action policies is essential to ensure justice and equality.

2. **Promoting Social Awareness**:

   Educational campaigns and community engagement can challenge caste-based prejudices and foster inclusivity.

3. **Economic Empowerment**:

   Policies that focus on economic upliftment, such as entrepreneurship programs and access to credit for marginalized groups, can reduce economic disparities.

4. **Political Reforms**:

Encouraging inclusive leadership and proportional representation can ensure that marginalized voices are adequately represented in decision-making processes.

5. **Leveraging Technology**:

Digital platforms can be harnessed to amplify marginalized voices and promote awareness about caste-based issues.

Conclusion

Caste and politics in contemporary India remain deeply intertwined, reflecting both the resilience of traditional hierarchies and the transformative potential of democracy. While caste continues to shape electoral strategies, policymaking, and social interactions, it has also provided a platform for marginalized communities to challenge entrenched inequalities and demand social justice.[13]

The future of caste-based politics in India will depend on the ability of political leaders, civil society, and citizens to address the structural inequalities perpetuated by caste while fostering an inclusive and equitable society. As India continues its journey as a vibrant democracy, the interplay between caste and politics will remain a critical area of study and engagement.
